Tyler Degand

Manhattan, KS | 7853411595
tylerdegand@gmail.com

Summary

Full Stack Developer with 2+ years of hands-on experience designing, developing, and implementing applications and solutions using a range of technologies and programming languages. Seeking to leverage broad development experience and hands-on technical expertise in a challenging role as a Full-stack Developer/Engineer

Experience

Purple Wave Auction | KS, Manhattan
Full Stack Web Developer | 10/2020 - Present

- Worked with numerous languages and frameworks such as JavaScript, PHP, Python, React, MySQL, Node, Sequelize and Express to modify and test changes to previously developed programs
- Write efficient and maintainable code to build new projects using JavaScript, Node.js and React, Material.ui and MySQL
- Adapt existing methods and procedures to create specialized solutions to intricate software problems by debugging and using problem solving skills
- Build and maintain API's and services using Node.js, Express, Sequelize and MySQL

CivicPlus | KS, Manhattan
Technical Support Engineer | 07/2019 - 10/2020

- Operate day-to-day functions of the department and follow all procedures
- Troubleshoot issues with how users implement content, work with and escalate bugs and minor design issues using knowledge of HTML, CSS and JavaScript
- Answer questions about product features
- Diagnose and resolve issues according to predetermined protocols
- Build and maintain strong relations with loyal clientele

Skills

Javascript, HTML, CSS, Jquery, Mysql, React, Elasticsearch, Linux, Git, Front-End Development, Back-End Development, Node.js, Sequelize

Education

Team Treehouse | Online
Full Stack JavaScript | 10/2020

Code Academy
C#, ASP.net
Currently taking classes for C# and ASP.net

Projects

GameShow App:

- A fun phrase game built using OOP principles
- Developed Using Javascript so users can easily access the game in the browser and play it
- Built with accessibility in mind, it is fully playable without a mouse

Full Stack Course App:

- Developed a web application for creating, storing and managing online courses for students
- Built its very own API to manage the user accounts, authentication and changes/creation of courses.
- Designed and implemented a MySQL database to store user accounts and the courses
